ANALYSIS OF THE SYSTEM OF PROVIDING FINANCIAL SECURITY OF THE ENTERPRISE

In order to support enterprises, it is essential to monitor key financial parameters of activity and identify risks that can impede the achievement of the financial interests of economic entities.

The purpose of the article is to develop guidelines for the analysis of the system of providing financial security of an enterprise.

By defining certain stages, the process of analysis of the system of providing the enterprise financial security can be elaborated. The algorithm consists of 4 stages. In the first phase, there is a constant and systematic analysis of the assessment of conditions of the external and internal environment. Also, during the first stage, there is a process of identifying the factors that actually have a destructive impact on the financial security of the company, where they are a detailed study and classification. In the second phase of quantitative evaluation in cases of special risk, the probability and the number of potential losses are determined. The third stage includes a development, which is aimed at neutralizing the threat of financial crisis. The final fourth stage is monitoring. It can be immediately told that this stage is one of the most important, as the continuous monitoring of the financial condition of the company is aimed at early detection of a financial crisis.

Thus, external and internal economic security threats require constant monitoring for the diagnosis of crisis situations at the enterprise and analysis of the system of providing the financial security of a company. The article deals with issues concerning the financial security of the enterprise. The factors of external and internal environment affecting the financial security of business are determined. The stages of providing the financial security of the enterprise's analysis are proposed and discussed in detail, and also the set of indicators, which are used during the diagnosis, is presented. The facilities of diagnostics

of the enterprise financial security and the financial diagnostic instruments are examined.
