This article is devoted to the issue of formation and functioning of consumer goods basket in Ukraine and abroad in terms of economic instability. The economy of the state depends on a great number of components. What will be the economy, so will be a development and a living standard of the population. In particular, consumer goods basket is also such a component. We understand consumer goods basket as a certain set of goods of the annual (monthly) consumption for a citizen, using which it is possible to see and determine the level of development of the country.

The structure and standards of the consumer goods basket were approved by the Regulation of the Cabinet of Ministers of Ukraine "On Approval of Sets of Food Products, Sets of Non-Food Products, and Sets of Services for Major Social and Demographic Groups".
